2/27/69

Dear Gary,

What you sent was not the entire Penabaz file. It was these pages only:

159:2-4
770:3-7
1140:3

In order to have the clearest possible copies for reproducing (the optimist in me) I have held them and return pretty clear copies in their place. I have kept these to themselves so I can return them. I would like the missing pages because some of those I made are not clear, have too much gray from overexposure. I am postponong repair of the machine because is costs $$$$.

I would like to be able to use a complete appendix in this book, if and when I can print it. All the reports, in full. I am keeping a separate file of them in the I hope not futile hope.

Sincerely,
